

Dear LIVINGAGRO friends, hereby the project partners are pleased to share with you the tenth edition of the project e-newsletter (May 2022 edition).

[“LIVINGAGRO – Cross Border Living laboratories for Agroforestry”](#) project is funded under the [ENI CBC Med Programme 2014 – 2020](#), first call for standard projects, with a total budget of 3,3 Million Euros and a 2,9 Million EU-contribution.

The project involves 6 organizations from 4 different countries (Italy, Greece, Lebanon and Jordan) and aims to share innovations related to agroforestry with stakeholders working with olives and grazed woodlands in Mediterranean countries, in order to help them increase profitability, sustainability, and biodiversity in the face of limited resources and environmental constraints.

The addressed issues are tackled using an *open innovation* approach, with two Living Laboratories enabling interactions among innovators and stakeholders. After conducting surveys and discussions to learn about stakeholders’ needs, the LIVINGAGRO team is presenting technological developments, practical research results, and other types of innovation to stakeholders who can benefit from them in both financial and environmental terms.
