

Dear LIVINGAGRO friends, hereby the project partners are pleased to share with you the eleventh edition of the project e-newsletter (August 2022 edition).

[“LIVINGAGRO – Cross Border Living laboratories for Agroforestry”](#) project is funded under the [ENI CBC Med Programme 2014 – 2020](#), first call for standard projects, with a total budget of 3,3 Million Euros and a 2,9 Million EU-contribution.

The project involves 6 organizations from 4 different countries (Italy, Greece, Lebanon and Jordan) and aims to share innovations related to agroforestry with stakeholders working with olives and grazed woodlands in Mediterranean countries, in order to help them increase profitability, sustainability, and biodiversity in the face of limited resources and environmental constraints. The addressed issues are tackled using an *open innovation* approach, with two Living Laboratories enabling interactions among innovators and stakeholders. After conducting surveys and discussions to learn about stakeholders’ needs, the LIVINGAGRO team is presenting technological developments, practical research results, and other types of innovation to stakeholders who can benefit from them in both financial and environmental terms.

Highlights of this new project e-newsletter edition:

- *Two additional episodes of the series “Discovering LIVINGAGRO innovations for the Greek agroforestry sector included in the dedicated Catalogue” with a focus on i) livestock grazing in olive agroforestry systems and ii) Olive tree, wild asparagus and free-range chicken polyculture*
- *Outcomes of performed field visits and field trials in Jordan and Greece*
- *Additional capitalization webinar organized linking research and innovation for Mediterranean olive multifunctional systems*
- *First Lebanese Business to Business (B2B) hybrid brokerage event organized in Beirut on 21st of July 2022*
- *Launch of the project ICT platform at the service of Mediterranean stakeholders of the agroforestry sector looking at innovation*
