

Dissemination Workshop on LIVINGAGRO Project and NARC Activities on Cover Crops and Forest Restoration

Activity 2.7.1

ACTIVITY COORDINATED BY THE NATIONAL AGRICULTURAL RESEARCH CENTER (NARC)

Within the LIVINGAGRO project activities (Activity 2.7.1), the National Agricultural Research Center (NARC) organized on the 21 of June 2023 an in person dissemination workshop entitled: "NARC activities on cover crops and forest restoration". The workshop aims to spread knowledge about the LIVINGAGRO project activities and involvement of relevant stakeholders using participative approaches.

The workshop was conducted by Dr. Salam Ayoub, the national coordinator of the LIVINGAGRO project in Jordan who implemented field demonstration in the olive orchards and Ms. Elham Abbadi from Al-Balqa Innovation Institution who implemented the forest restoration activities in Arda District, Jordan.

A total of 96 participants including policy makers, researchers from NARC and universities, farmers, entrepreneurs, agricultural engineers, Ministry of Agriculture, associations and other relevant stakeholders from Jordan attended this workshop.

After welcoming the audience by Dr. Nizar Haddad, the Director General of NARC, Dr. Salam Ayoub presented the objectives, the activities and the outputs of the LIVINGAGRO project, the ICT platform, and the results of the field trial on cover crops that recommend planting of legume cover crops within the olive orchards. Ms. Elham Abbadi presented the outputs of the forest restoration

activities in Arda District, who succeeded in planting around 3000 forest tree seedlings in the forest land and engaging the local community with the restoration activities.
The workshop ended by an open active discussion between the attendees and LIVINGAGRO team.
